PROFESSIONAL EXPERIENCE

- Teaching Assistant, INFO 478: Population Health Informatics** March 2025 - Present
- Mentored 35 students in applying statistical programming techniques using R.
 - Facilitated weekly lab sections, guiding students through technical workbooks focused on drawing actionable insights from health datasets.
 - Conducted code reviews and provided detailed technical feedback on R scripts and a multi-stage group research project.
- Husky Winter Sports Web Developer** August 2025 - Present
- Created the organization's website huskywintersports.org (React + Vite) relied on by over 100 users every year for information and registration.
 - Consolidated scattered information for parents and prospective members, streamlining communication.
 - Applied a mobile-first design strategy, improving accessibility for a majority mobile audience (~ 60% of users).
- University of Washington iSchool Research Seminar** January - March 2024
- Collaborated across undergrad-PhD to build a citation dataset for expert testimony in PFLAG v. Abbott.
 - Used ATLAS.ti and Google Sheets to map citation flows and analyze source credibility.

PROJECTS

- WSDOT iOS App Redesign: UW iSchool Informatics Capstone** January - Present
- Developed a modernized iOS app in Swift and SwiftUI on a 5-person team for the Washington State Department of Transportation, replacing a legacy statewide travel app.
 - Architected the app's structure and file system and built the REST API layer connecting live WSDOT data to the app.
 - Delivered a full design and 80% functional build; continuing development with WSDOT toward a potential 2026 release.
- Inter-User Difference Modeling for Recommendation Systems** September - December 2025
- Resolved a critical accessibility limitation in a published LLM personalization framework, refactoring research pipelines to run reliably across four AWS SageMaker GPUs on standard cloud infrastructure
 - Decoupled compute from storage using S3 checkpointing, reducing cloud costs and enabling fault-tolerant execution across distributed instances

SOFTWARE TOOLS

Languages	Python, Java, JavaScript, React, SQL, HTML/CSS, R, Swift
Platforms	AWS, Azure, Firebase, Office Suite, Git, Bash, PowerShell, Jupyter Notebooks, Agile

EDUCATION

Bachelor of Science in Informatics September 2023 - Present
University of Washington

Co-Curricular Activities

Husky Winter Sports Diversity, Equity and Inclusion Officer, April 2025 - Present

Husky Winter Sports Ski Instructor, January 2024 - Present

Humanities First Student Advisory Board, September 2024 - Present

Semester Abroad at The University of Edinburgh, September - December 2024

Information, Technology, and Culture in Modern South Korea Early Fall Study Abroad, August - September 2025
